Your One-Stop Safety Solutions Provider

info@tomsey.com.ng | +234 703 306 7600 | +234 816 055 1278 | +234 802 244 1836 | www.tomsey.com.ng

The Operational Safety Case and Design Safety Case have become critical requirements for all operators in the Oil and Gas Industry. Whether Upstream, Midstream, or Downstream facilities, the regulators - NUPRC and NMDPRA, have improved their oversight function to ensure all facilities operating in Nigeria have the right safety protocols in place to protect the facility, the environment, and the entire value chain.

Tomsey Engineering and Services is positioned to support you in developing your Operational Safety Case to meet all regulatory requirements. With over 25 years in the Oil and Gas industry, working closely with regulators and operators, we have all that is required to support you in developing an APPROVED Operational Safety Case.

Let's begin your journey toward full regulatory compliance.

HEALTH AND SAFETY SERVICES

The workplace is a major influence on the health, wealth, morale and productivity of employees, and visitors alike. Organisations are becoming increasingly aware of the need to respond to the challenges of ensuring their environments and workplaces are safe and healthy and that they meet all statutory requirements. Often this requires the support of external health and safety consultants.
